

# Mobile Office, Inc.

## GripMaster Series

One of our most popular and universal models - the Grip Master. A large non-skid surface grips the laptop and helps to keep it from sliding while the vehicle is in motion. The various storage compartments manage file folders, books, pens and other mobile office essentials.

Choose from the **AEGRIP-01** which features a slide-out work surface for writing or select the **AEGRIP-02** if additional writing space isn't necessary. Both are safely secured in the vehicle with a seatbelt.

The desks measure 26" from back to front. The 11" of height in the seat will be enough to clear the center console. The grip area on top is 16" by 15". With the AEGRIP-01, the slide-out work surface extends out another 12." Wt. 19lbs.
