## RoadMaster Car

Our customers have been asking for an Auto Exec that truly helped put the laptop in a position that was easy to use and type - the RoadMaster Car is the solution. The 21" wide top has an adjustable laptop plate so the laptop can be moved to a comfortable position for typing. The laptop plate extends past the edge of the desk by another 3 inches making it 24" of overall reach from the far edge of the desk.

The Optional Printer Stand - mounts to the top corner of the Auto Exec RoadMaster. The printer platform measures 7" by 13" and comes with a nylon strap to help secure the printer.

Secure the desk with the seatbelt in your vehicle. An adjustable sliding plate secures the laptop to the desk with Velcro and a strap. Fits most cars, smaller SUV's, and Mini-Vans.  
Optional Add-On: Printer Stand, Carry Bag (Nylon bag to protect your case).
